

LF FA City 7.5t

Exterior

- Day Cab
- Central door locking, lighting test, key with remote control
- Optional external sun visor
- Optional LED daytime running lights
- Electrically adjustable mirrors
- Lexan headlamps
- Optional fog lights combined with cornering lights
- Headlamp panel, bumper and cab steps in stone grey or cab colour
- Various types of roof spoilers and fenders
- Optional kerb view window

Interior

- Air-suspended or luxury driver seat with optional armrest
- Fixed, air-suspended or luxury co-driver seat
- Optional soft-grip leather steering wheel
- Optional air conditioning
- Electric windows
- Optional hands-free TruckPhone
- Antennas: AM/FM, GSM, GPS
- Adaptive Cruise Control + Forward Collision Warning
- Basic-immobiliser
- Driver Performance Assistant (DPA)
- Optional DAF Connect fleet management system
- Roof hatch with manual or electrical operation

Safety

- LDWS
- VSC
- Optional reverse warning
- Optional air bag
- Optional fire extinguisher

Suspension and axles

- Parabolic front suspension; axle load 3,6 t
- Parabolic suspended, single reduction rear axle; axle load 5 t
- Optional air suspended rear axle 5 t

Tyres

- Steel disc wheels, silver grey
- Tyre size front and rear: 215/75 R17.5

Driveline

- Engine output 115 -127 kW (156 - 172 hp); torque 500 - 600 Nm.
- Optional cold-start system for cold climates below -12°C
- 5-speed manual gearbox
- Optional heated moisture separator
- ASR
- Engine idling shut down 5 min.

Brake system

- Exhaust brake
- Automatic Emergency Braking System (AEBS)
- Ventilated disc brakes front and rear

Chassis

- Wide range of wheelbase (3.05 - 5.00 m) / rear overhang combinations
- Side member: 210/4.5 mm
- Horizontal exhaust on the right-hand side of the chassis
- 80-A alternator, 2x 125 Ah batteries. Optional 100-A alternator and 2x 175 Ah batteries
- Plastic fuel tank(s), capacity 110, 155 or 185 litres
- AdBlue tank 25 litres at right hand side
- Low level air intake, optional on cab
- Hole pattern for body attachment
- Optional LED rear lights
- Spray suppression
- Optional side marker lights

Body and body preparations

- Application connector chassis
- Optional application connector tailift
- Optional BAM1 or 3, loose supply

Services

- To minimize the risk of unplanned downtime:
 - ITS: 24/7 breakdown support
 - Repair and maintenance contracts (DAF MultiSupport)

DAF

Created to deliver

The advantages of the LF FA 7,5t City truck

Intensive city distribution with a lot of stop-start traffic creates specific demands for operators and their trucks. That is why DAF has developed the LF City. With a new, efficient and responsive 3.8 litre PACCAR PX-4 engine optimised for urban operation, combined with the unsurpassed manoeuvrability and low kerb weight that makes the DAF LF unique in its class. The capabilities of a truck with the agility of a van.

Agile

Thanks to a maximum wheel deflection angle of 53°, the LF has the smallest turning circle in its class. Needless to say that this is achieved with effortless steering. Next to that, the LF provides a perfect trade-off between compact cab dimensions and inner cab spaciousness.

Representative

Attractively designed front panel with large radiator grille, centrally positioned DAF logo and plenty of space for your advertising. The modern, spacious interior, with a dashboard designed around the driver. The controls are within reach and logically grouped by function. They focus on practicality and provide an ideal work space.

Safe

The LF can be specified with several safety features like Adaptive Cruise Control including Forward Collision Warning and Advanced Electronic Braking System, a kerb view window and a reverse warning system which ensure safe manoeuvring through urban environments. An air bag and a fire extinguisher are also available, increasing safety in emergencies.

Robust

Lexan headlamps and optional LED rear lights, fully-galvanised steel bumpers and non-slip aluminium steps, illuminated when the door is open, reduce the likelihood of accidents and increase safety.

Intelligent

The central display provides information in the driver's own language (based on tacho card) and includes DAF Driver Performance Assistant to guide the driver into the most economic driving style.

Body builder friendly

The completely flat chassis with various components positioned inside the chassis is an ideal basis for the bodybuilder to work on. In addition, body attachment modules are ex-factory available to facilitate easy attachment of bodywork or equipment.

Economic

The electric and electrical system can easily be connected with that of the superstructure to ensure proper operation of the vehicle applications with user friendly messages on the DAF instrument panel.

Load capacity

Thanks to the lowest chassis weight in its class, and nine different wheelbases of up to 5.00 metres to choose from, an impressive maximum load capacity is realised. This ensures a flexible base for any application.

Visibility

Large mirrors and windows provide excellent visibility and the optional kerb view window in the passenger door adds to safety by making it easier for the driver to see cyclists and pedestrians alongside the cab.

Easy access

The low cab floor together with convenient steps, doors that open wide (90°) and corner deflectors to ensure clean door handles, allow easy access to the vehicle.
